- Competition 3 - 6th place, Captain 4th Alliance

Upcoming Outreach and Competition Plans

- Last chance competition February 2024
- Outreach & Community Demos at Maker Faire, Beakerhead, and FIRST Alberta Off Season Event in Calgary May 2024.

A Proud member of the Alberta Tech Alliance **FIRST Robotics Community** – Generously Sponsored by

Coach's letter – *"We have out-performed even the most optimistic expectations. We are a team of rookie Mentors and Students who came together with a plan to build a functioning robot. We learned together starting in September and progressed in our skills and teamwork against many practiced and established teams full of students who have done this for many more years. No matter what happens at the last chance qualifiers you have done an amazing job. I see a real team here. Every single one of our students is truly a valued member of the team and has contributed immensely to our success."* ~ **Craig Lindsey, Mentor**
