

Crazy Artificial Intelligence Team 16596 CAI

January 26, 2024 Outreach event

We went to visit and do a presentation at Hawkwood Elementary. This involved packing up and transporting our full FTC Field and current game pieces.

We took 2 robots and let the students drive and work the controls. We also showed how we code and program the robot.

The grade 6 kids were very engaged with questions and had tons of fun!

We are hoping they start their own FIRST team so they can learn as much as we do!
